typical biological time course

Zhang et al., 2022

- ▶ fslab package for statistical computing
  - ▶ Hypothesis testing
  - ▶ Signal processing
  - ▶ Interpolation
  - ▶ Regression
  - ▶ Descriptive statistics
  - ▶ ...

- ▶ dimensionality reduction to reveal
  - ▶ global trends
  - ▶ data quality/replicate reproducibility

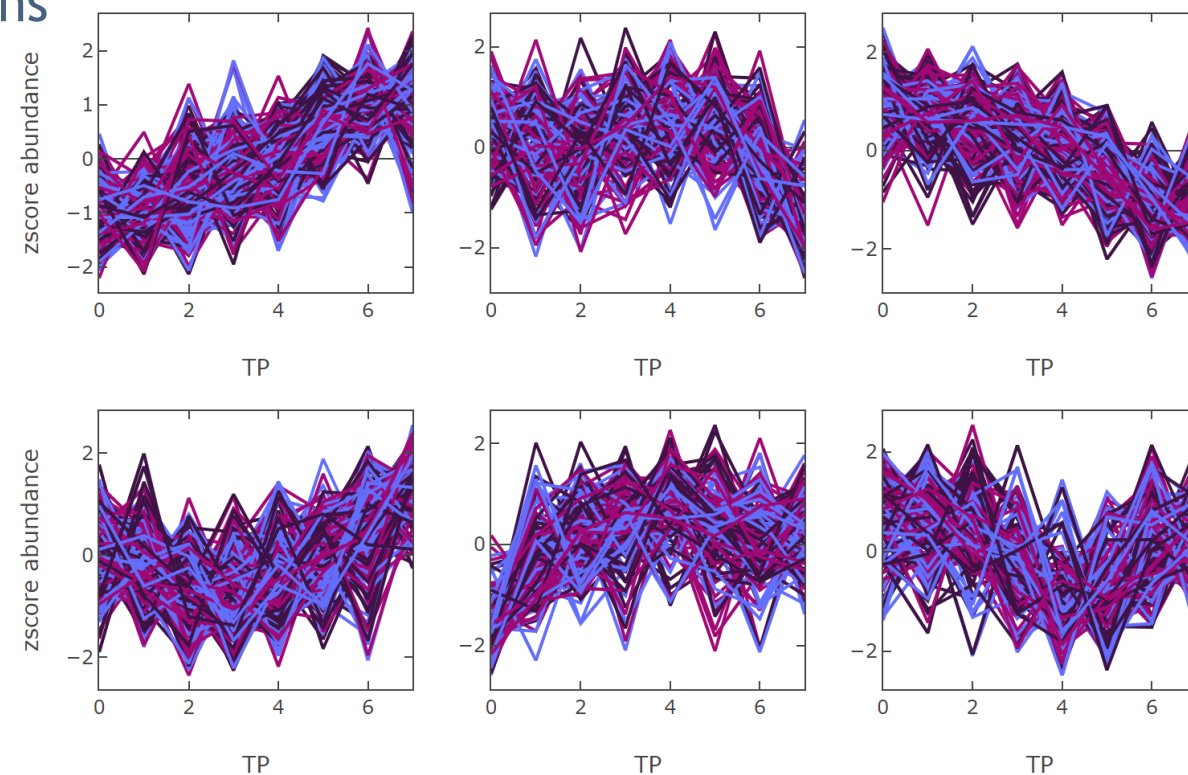

PCA score plot

## clustering

FSharp.Stats.Clustering

- ▶ cluster data set in groups of similar behaviour
  - ▶ k means clustering with  $k=6$
- ▶ enrichment analyses identify common patterns

# correlation networks

FSharp.Stats.Correlation

Cytoscape.NET

Graphscope

[fslab - correlation-network](#)  
[CSBlog - community-detection-vs-pca](#)

- ▶ construction of co-expression network
- ▶ allows identification of protein co-regulation and regulatory clusters

# differential analysis

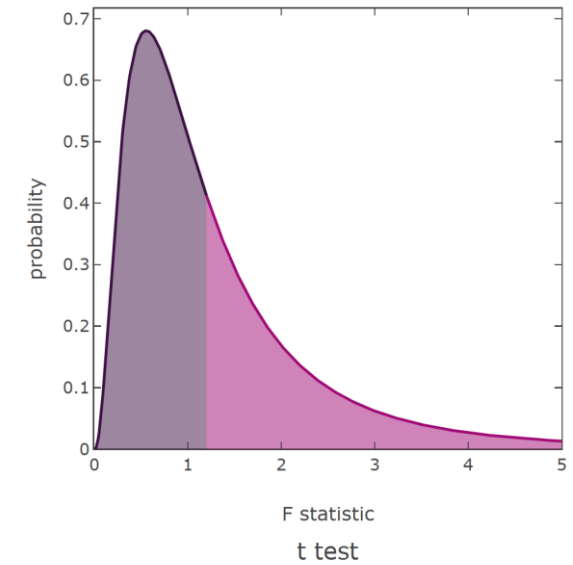

FSharp.Stats.Testing

- ▶ statistical testing reveals differential protein abundance

— protein A  
— protein B

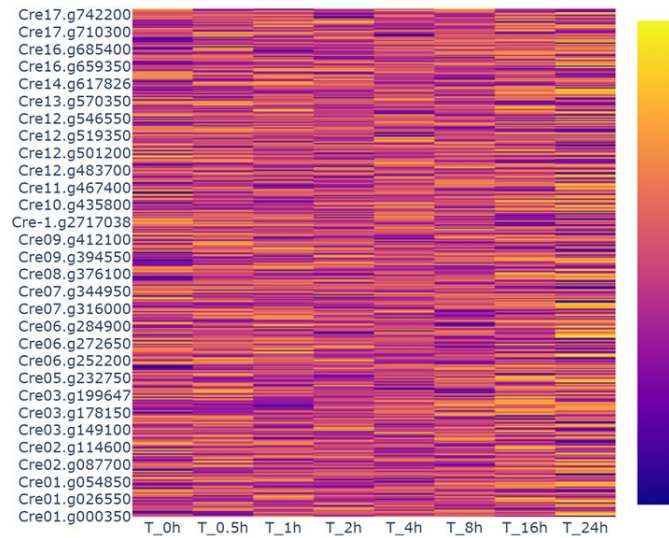

ANOVA

## fitting/interpolation

FSharp.Stats.Interpolation

## fitting/interpolation

FSharp.Stats.Interpolation

← 7<sup>th</sup> order polynomial

$$p(t) = 4.7 + 35.3t - 34.6t^2 + 16.8t^3 - 4.5t^4 + 0.7t^5 - 0.05t^6 + 0.002t^7$$

## fitting/interpolation

FSharp.Stats.Interpolation

(natural) cubic spline

► instead of 8 coefficients (polynomial)  $4 \times 7 = 28$  coefficients are needed

- 14 interpolation constraints
- 6 slope continuity
- 6 curvature continuity
- 2 boundary conditions

$$p_1''(1) = 0$$

$$p_7''(8) = 0$$

← natural cubic spline

$$p_1'(1) = p_7'(8)$$

$$p_1''(1) = p_7''(8)$$

← periodic cubic spline

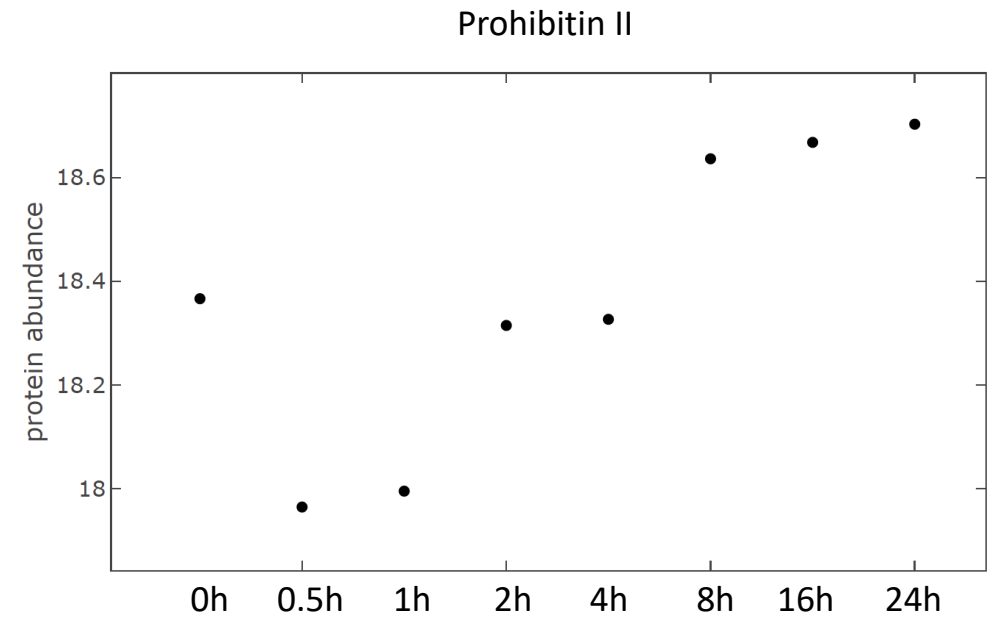

## fitting/interpolation

FSharp.Stats.Interpolation

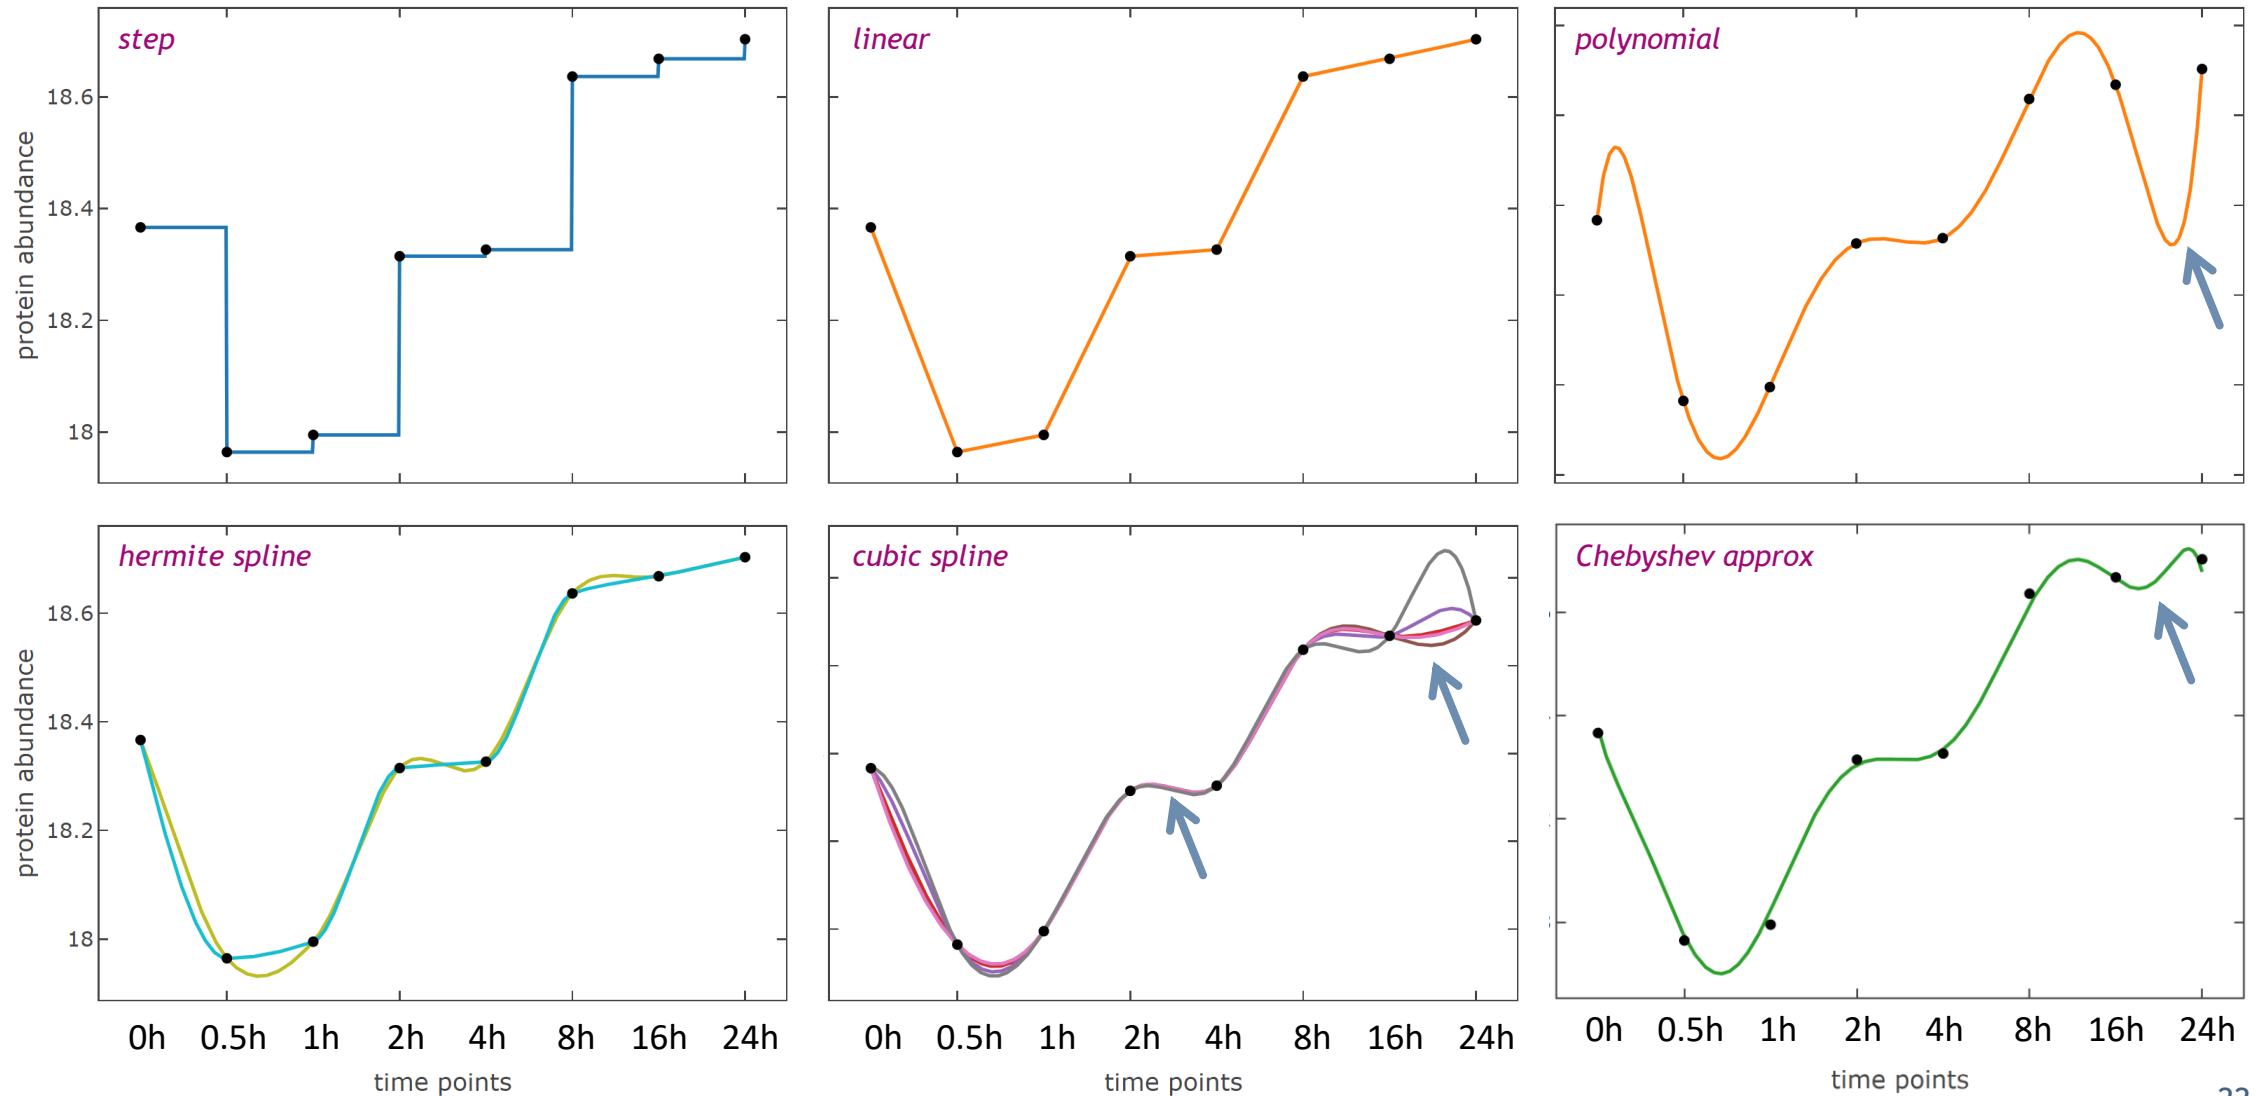

```
open FSharp.Stats
let x,y,slopes = ...
Interpolation.interpolate(x,y,InterpolationMethod.Step)
Interpolation.interpolate(x,y,InterpolationMethod.LinearSpline)
Interpolation.interpolate(x,y,InterpolationMethod.AkimaSubSpline)
Interpolation.interpolate(x,y,InterpolationMethod.CubicSpline CubicSpline.BoundaryCondition.Natural)
Interpolation.interpolate(x,y,InterpolationMethod.HermiteSpline (HermiteMethod.WithSlopes slopes))
Interpolation.interpolate(x,y,InterpolationMethod.Polynomial)
...
```

# Back to biology and protein kinetics

# Back to biology and protein kinetics

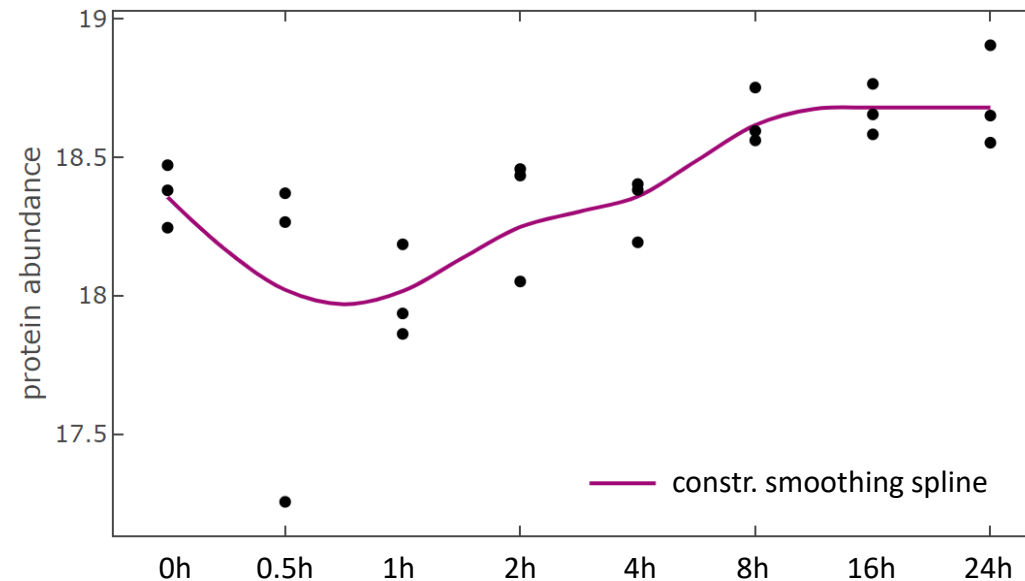

# Back to biology and protein kinetics

- ▶ Necessity to incorporate **smoothness** assumption
- ▶ Measurement **variance** serves as important information and should be considered
  - ▶ interpolation → regression

# Back to biology and protein kinetics

- ▶ Necessity to incorporate **smoothness** assumption
- ▶ Measurement **variance** serves as important information and should be considered
  - ▶ interpolation → regression
- ▶ Usage of constrained smoothing splines allows for accurate shape classification

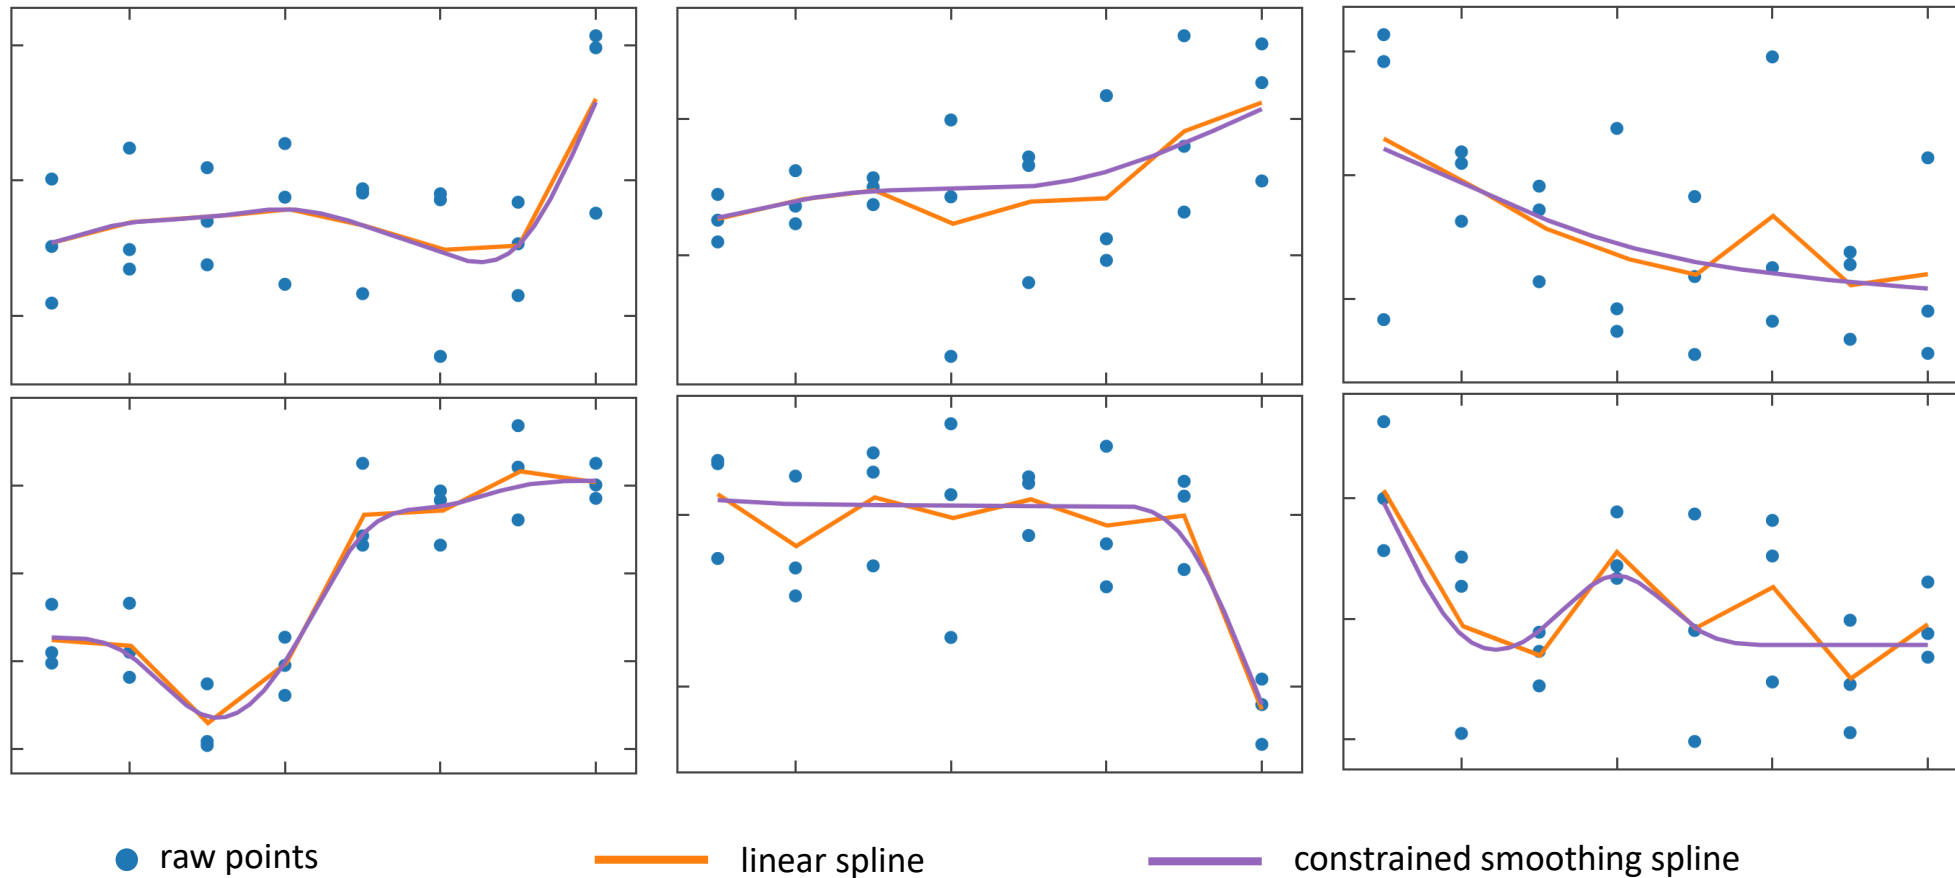

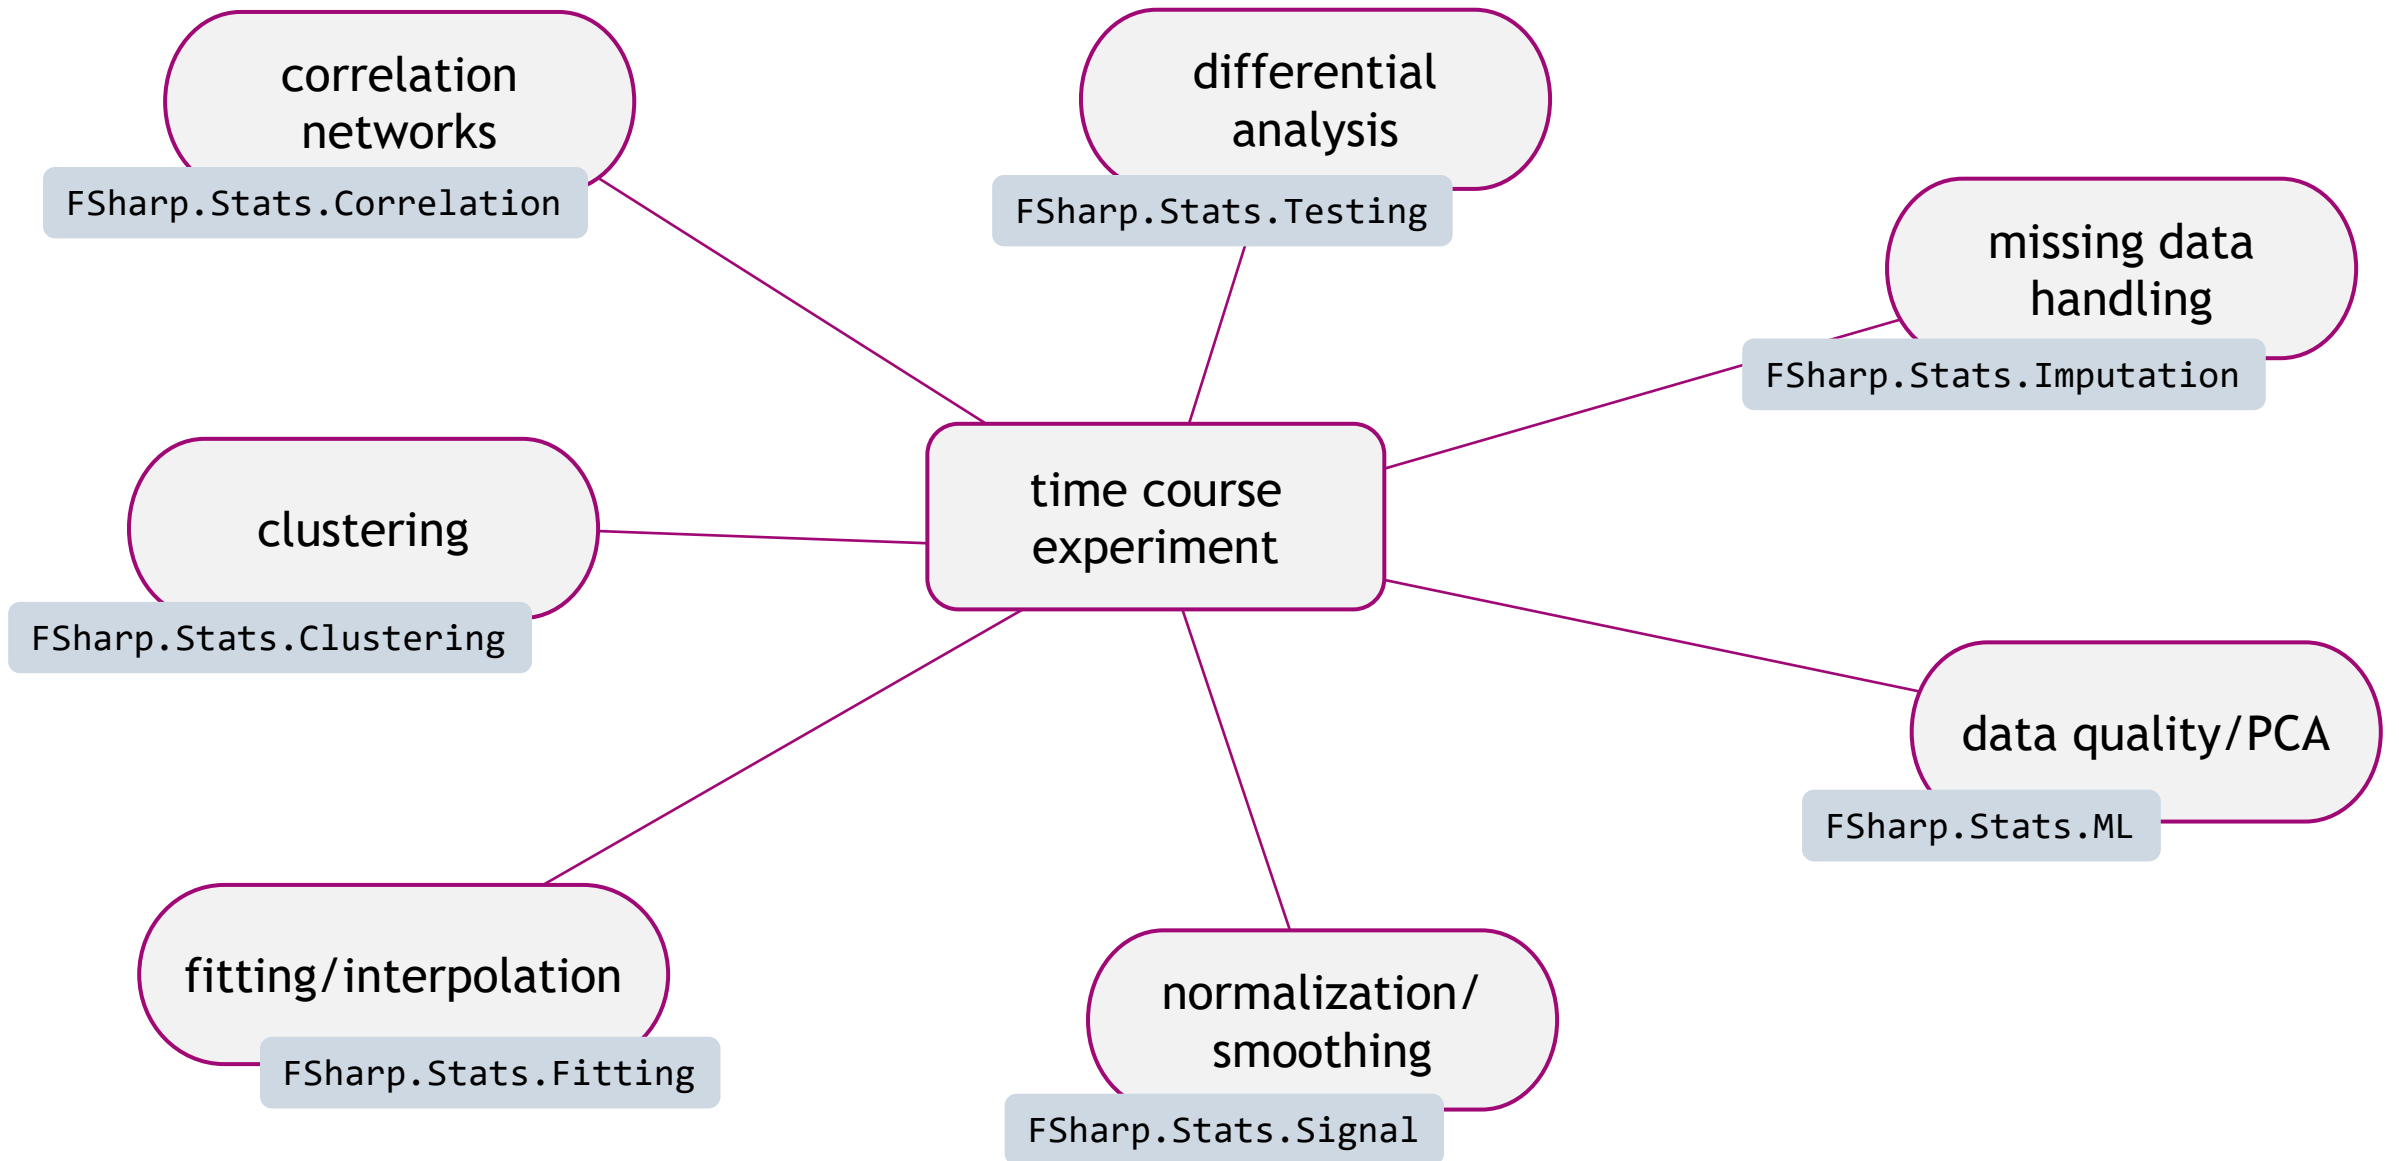

→ class: minimum@0.75 h

# Back to biology and protein kinetics

- Usage of constrained smoothing splines allows for accurate shape classification
